## complimentary services during construction

Throughout the construction of your clients homes, there will be a dedicated Client Support Officer to assist with any queries the client may have in regards to the construction process.

Crystal Blue will keep your clients updated with regular correspondence in the form of letters/emails detailing construction status, and photographs throughout the course of the construction of their home.

All communication will be copied to yourself to assist with the monitoring of your clients' home. You will have access via the Crystal Blue website to view photographs as construction progresses.
